ACRYLENS REPLACEMENT DIFFUSERS

Acrylens® Diffusers are designed as a replacement part for extruded wrap diffusers that are no longer available. Acrylens will work on any fixture that the diffuser simply hangs on the fixture.

The three-piece design, two Clear Lineal Prism Acrylic side rails, attached to a P12 Pattern Clear Prism Acrylic bottom panel, looks much like original equipment and is available in large and small quantities. End caps are available as an option.

To order Acrylens simply fill out the form below and fax to us. A quotation will be sent to your fax or email for approval. Be sure to include your phone, fax and optional email
